

## BEATA WEBINAR ON LOW & ZERO AVIATION IN BARENTS

4 February 2021 10:00-12:00 (CET)

Aviation is vital for the connectivity in the Barents region. Until March 2020 aviation was part of the everyday life for people and business in Barents. Our sincere hope is to return to everyday life as soon as possible. However, bringing aviation back to a normal situation will lead to more CO2 emissions contributing to global warming. What is the status for the development of low and zero emissions solutions in aviation and can electrification or other energy sources contribute to substantial reductions of CO2 emissions? The BEATA Webinar will focus on current ambitions and projects and invites stakeholders and experts to join in. The planned BEATA seminar on aviation in March 2020 had to be cancelled of obvious reasons. We have received several requests for bringing the topic up again and we are pleased to invite you to a webinar on low and zero emission aviation in Barents 4 February.

### Agenda

09:45-10:00	Log on	
10:00	Housekeeping, welcoming words from the Chair	Paal Iversen, BEATA Chair
10:05-10:45	Electrification; status, potential, challenges & timeline	Olav Mosvold, Avinor Norway Jan Petter Steinland, CAA Norway
