

1. To organize programs of exchange of groups for training of firemen from Russia to Germany, Sweden and Norway. Level - chief of the shift, the operative staff of fire service on duty. Many firemen visit such trainings at their own expense. We have to organize them in a descent official way.
2. Firemen of the whole world use tactics of the active ventilation on fires PPV-NPV. It's actively developed in Sweden and Germany. It only starts to appear in Russia. Work is being conducted on the level of enthusiasts. Methodical recommendations about active ventilation on fires developed in Moscow. It will be very useful to organize a series of the seminars for firemen from Russia with invitation of experts from Sweden and Germany.
3. Smoke divers competitions are annually hold in Murmansk and Petrozavodsk on very good level. Participants, firemen arrive from Finland and Germany arrive at their own expense. Would be good to organize that teams are supported in proper official way to arrive to those competitions.
4. Chemical hazards training in Sweden is conducted on the top level and highly valued by our rescuers. In the Russian chemical hazards course based on Polivannogo center in Arkhangelsk, where several dozens of tons of ammonia and chlorine are utilized, participants get real experience. Rescuers from Finland and Sweden appreciate training in that center. We propose to organize programs of exchange of groups for training of rescuers.
5. "Close to reality" exercise in the training center in Moscow - with actors in roles of the victims, with professional make-up and special effects. (Head of the course - the rescuer of 1 class A.V. Dergachev). Foreign delegations – from GB and US were very much impressed because of combination of professional drills along with strong psychological effect and agreed on importance of such training for rescuers. If interested, we could organize such training for rescuers from your countries too.
6. Something to remember – we propose to organize a joint jump on the North pole on parachutes: annually to the area of the North Pole jumps a group of parachutists for organization of scientific camp Barneo (not mix with Borneo). There is an arrangement to make a joint jump – internationally, together with your rescuers.
