Value of Cross Border Cooperation

Create structures for cross border cooperation or networks (to know each other and each others)

- Identifying new relevant actors
- Creating new contacts
- Contacts going to be strengthen
- Pre conditional actions for further cooperation

Exchanging knowhow – added value mostly on local level (learning from each other)

- exchange of knowledge between partners to the promotion of actions for both sides of borders
- We learn from others, others learn from us

Mutual solving of the problems – mutual added value (learning together)

- The project partners, ev. end users, and target market share in common a problem
- Solution will be achieved by working together

Thank you for attention!

Logical framework (LF) matrix

Your project? Your Logical framework

- **What are your challenges/problems?**
Identify key problems

- **Could cooperation help?**
Identify potential stakeholders – target group, end users, stakeholders, co-financiers

- **Objective analysis** – developing solutions from the identified problems

- **Do the objectives match Kolarctic thematic objectives?**
